

# Event Halls

Spectacular and Unique

Bern Theater Cube

As an ingenious interim solution, for those times when the usual venue does not happen to be available, or as a creative statement at the location of your choice, temporary halls by NUSSLI make it possible for you to hold your event in any place imaginable.

**NUSSLI**

Our unique hall systems are flexible, cost-effective and enable even multi-story constructions with extremely short assembly and disassembly times. We create hall structures out of proprietary material, on all types of terrain, without elaborate foundations and large construction cranes on construction sites of minimal size. Sustainability is of the utmost importance to us. While temporary buildings already conserve resources in and of themselves, we go even further by using innovative and reusable materials. Thereby ensuring a good ecological balance.

## Services for your Event

The NUSSL event halls can be combined with each other and are constructed and equipped according to your needs. This allows agencies and architects to give their creativity free rein when designing the facades and shape of the hall.

**System Construction Halls**  
Modular and flexibility with short delivery times

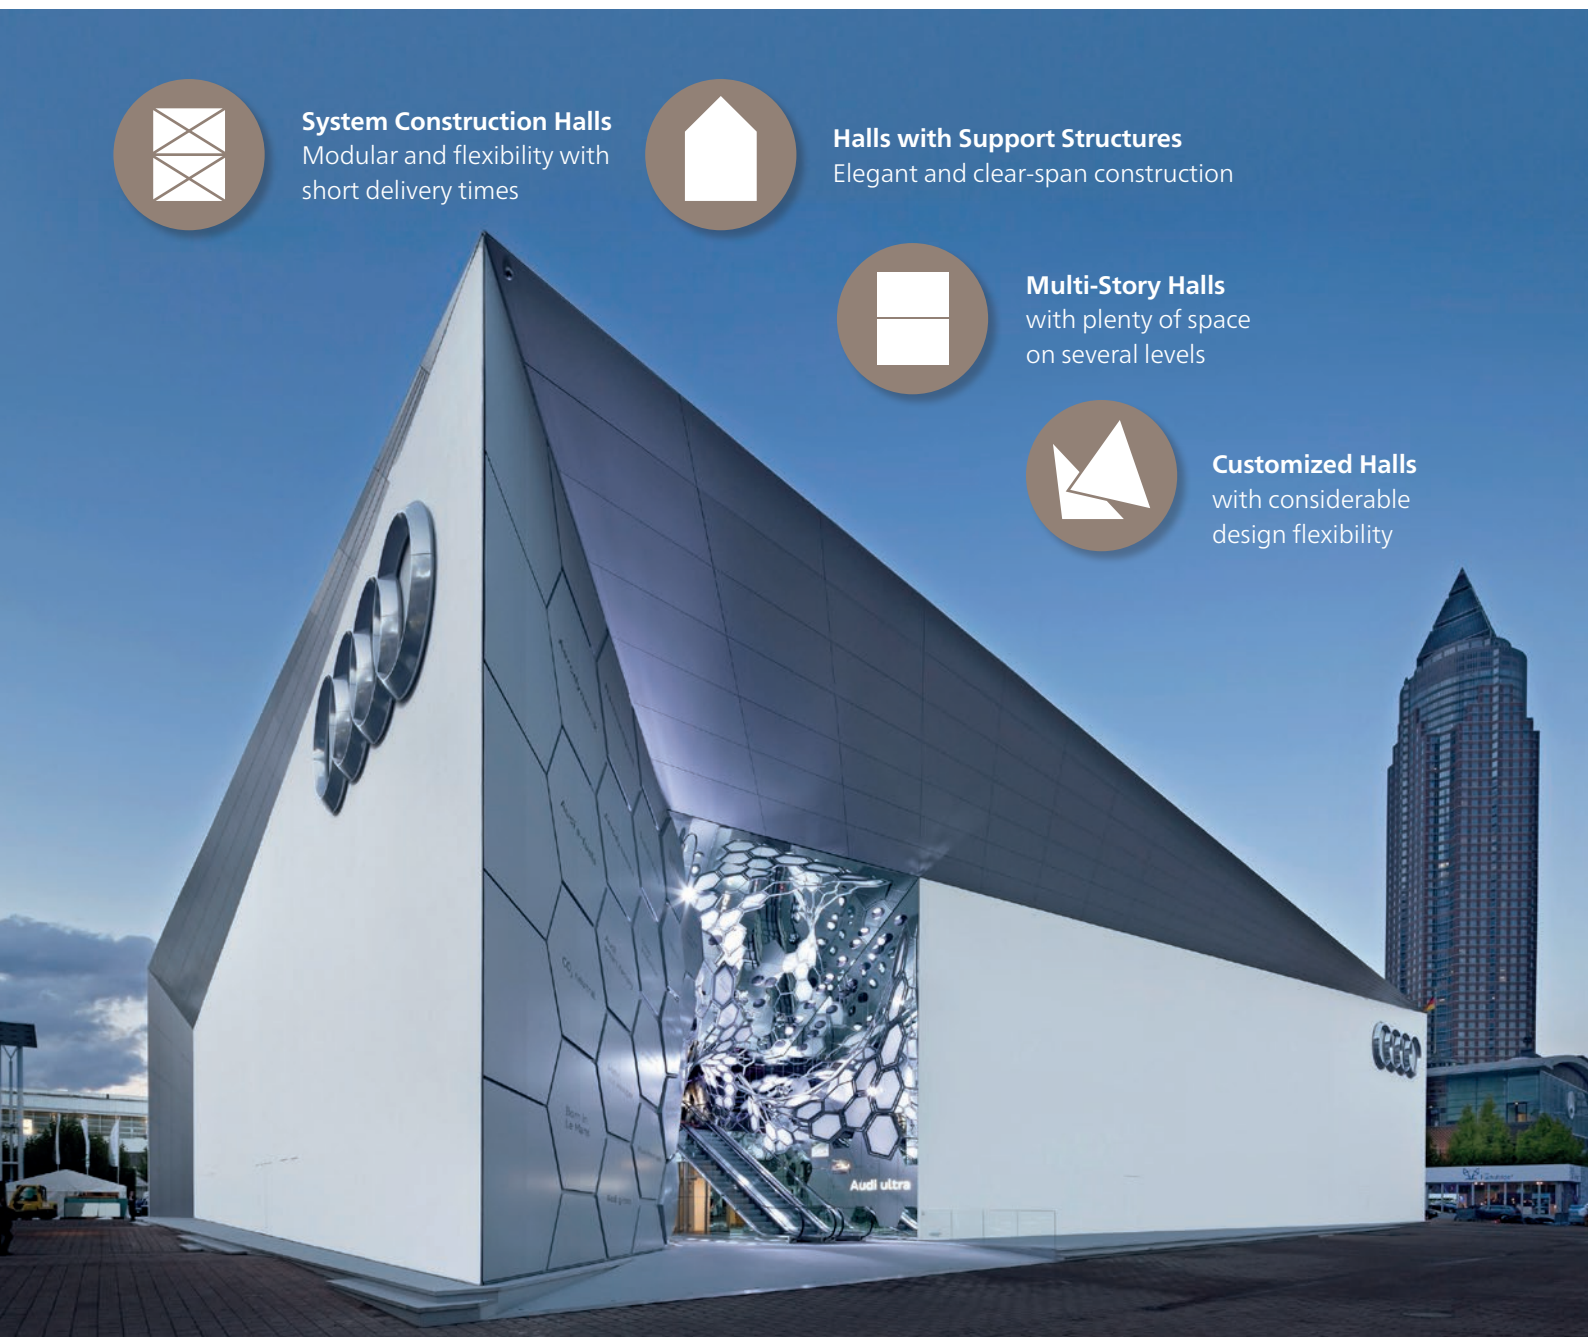

**Halls with Support Structures**  
Elegant and clear-span construction

**Multi-Story Halls**  
with plenty of space on several levels

**Customized Halls**  
with considerable design flexibility

# Turnkey and Customized Spatial Structures

NUSSLI offers customized single or multi-story hall construction solutions, in varying lengths and heights, to fit every requirement. Our systems allow for simple spatial structures, highly complex special structures and exceptional architectural design for a temporary service life of any duration.

## System Construction Halls

- Column free span of up to 40 m
- Low point loads
- No foundation required
- Extendable and expandable
- Short delivery and assembly times

## Halls with Support Structures

- Variable span widths
- Little startup effort
- Optimized use of materials
- Integration of systems
- Quick installation due to prefabrication
- Medium to long-term use

## Multi-Story Halls

- Two-story or multi-story structures, up to 20 m without columns
- High load-carrying capacity
- Numerous design options (as a full-surface intermediate floor, as a gallery, as a terrace, etc.)

## Customized Halls

- Customized solutions
- Combination of different hall construction systems
- Innovative and exceptional architecture, results or shapes

## Comprehensive Service from A to Z

We support you with know-how and foresight through all phases of the project. You will benefit from being able to access many services from a single source, as our range of services includes everything from **partial services** to **complete turnkey service**.

## Equipment and Options

- Technical building services
- Stairs, elevators and lifting equipment, escalators
- Customized facade design
- Room units and partition walls
- Podiums and mezzanines
- Grandstands, stages and event structures
- Furnishings
- Decoration and Interior Design
- Event technology

# Reference Projects

When designing and building temporary event halls, our experts take on extraordinary challenges and inspire event organizers and the public alike. Our know-how ranges from event halls to sports structures to exhibition halls.
